

ROBO RASHTRA '26

YANTRAUTSAV

WELCOME NOTE

Welcome to Yantrautsav – an exciting event calling all aspiring innovators and young minds to showcase their creativity, passion, and robotics skills!

- Open to all skill levels – whether you're a beginner or an experienced creator in innovation.
- Golden opportunity to showcase innovative ideas and robotic creations.
- Open to participants of all age groups, ensuring diversity and exciting experiences.
- Demonstrate the technology behind your creation and explain its working.
- Solve real-world problems or introduce new concepts using this platform to share unique ideas.
- Impress the audience with your ingenuity for a chance to win exciting prizes!

In Yantrautsav, participants are invited to showcase their ingenuity and engineering skills by bringing a fully functional robotics-related model for the exhibition. This challenge is designed to inspire creativity and innovation, allowing participants to demonstrate their understanding of robotics principles in a practical setting.

The competition is divided into two categories:

- Junior League for younger or less experienced participants.
- Senior League for advanced participants. Both leagues will be evaluated on design, functionality and presentation, providing a platform for all skill levels to shine.

EVENT CATEGORIES

Category	Junior Category (Students of HSC or below)	Senior Category (Undergraduates and above)
Eligibility	Students of HSC (12th) or below	Senior Category (Undergraduates and above)
Objective	Exhibit self-made robots, explain their working and unique features.	Showcase working robots or prototypes with a focus on innovation and problem-solving.
Prize - 1st	₹ 15,000	₹ 25,000
Prize - 2nd	₹ 10,000	₹ 20,000
Prize - 3rd	₹ 5,000	₹ 15,000
Special Note	Working robots gain extra points.	Fully operational bots gain extra points.
Category	---	application domain*

SENIOR CATEGORY

PRIZE POOL

60,000/-

JUNIOR CATEGORY

PRIZE POOL

30,000/-

ROBOTICS APPLICATION DOMAINS

(Applicable to both Junior and Senior categories, but not limited to:)

1. Sustainable Energy – wind, hydroelectric, solar power, etc.

2. Task-performing autonomous projects – autonomous robots, autonomous drones, etc.

Subcategories:

- Outdoor Autonomous Projects
- Indoor Autonomous Projects (e.g., smart home projects)
- Other Examples: Arduino-based Snake Robot controlled using Android app, wall climbing robot, robotic vehicle controlled by hand gesture.

3. Task-performing remote-controlled projects

4. Agricultural projects – grass cutter, agribot, agricultural tasks

ROBOTICS APPLICATION DOMAINS

5. Robotic arms – simple robotic arm, flex sensor arm, algorithm-based arm, Android-controlled arm, hand motion controlled arm.

6. Military application projects

7. Humanoid and social projects

8. Mechanical education projects

Examples: Emergency braking system in four-wheeler, 8-leg spider robot using Theo Jansen linkage.

9. Aquatic projects

Examples: Solar lake pool cleaning drone, oil skimmer RC boat.

10. Medical field-related projects

11. Swarm projects

12. Educational robotic projects

13. Entertainment and art projects

TEAM SPECIFICATIONS

- Each team may consist of 1 - 4 members.
- Teams must register their bot and members prior to the event.

MARKING STRUCTURE (100 MARKS)

1. Working Status – 25 Marks
2. Innovation & Originality – 20 Marks
3. Technical Feasibility & Implementation – 20 Marks
4. Presentation Skills – 15 Marks
5. Problem Statement & Relevance – 10 Marks
6. Q&A and Judges' Interaction – 10 Marks

NOTE: Organizers reserve the right to modify or amend the competition rules at any time. Participants will be notified of any changes. The decision made by judges is final and cannot be contested.
